Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: WO 99/41596 A (77 ELEKTRONIKA M & UDBLAC ; FOELDVARI ZSOLT (HU); SUEMEGI LASZLO (HU)) 19 August 1999 (1999-08-19)

D2: EP-A-0 646 784 (MILES INC) 5 April 1995 (1995-04-05)

D3: EP-A-1 118 859 (WAKO PURE CHEM IND LTD) 25 July 2001 (2001-07-25)

D4: EP-A-0 837 320 (BAYER AG) 22 April 1998 (1998-04-22)

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of **independent claims 1, 11, 14, 15, 25, 30, 33** is not new in the sense of Article 33(2) PCT.

2.1 The document **D1** discloses (see: abstract; figures 3-5; page 2, lines 13-19; page 3, line 29 - page 4, line 26; page 5, line 12 - page 7, line 29; page 9, lines 17-19; page 10, lines 14-29; page 11, line 23 - page 12, line 5; page 13, lines 1-3; page 13, line 20 - page 14, line 6):

a method of identifying a test strip having a set of test pads , said method comprising:

A. impinging on said set of test pads at least one test signal having a wavelength;

B. detecting a set of reflected signals from said set of test pads;

C. generating an image comprised of a set of reflectance values derived from said set of reflected signals;

D. determining a test pad type from the image for at least one test pad from the set of test pads by comparing a reflectance value associated with the test pad with a set of reference reflectance values, wherein each of said reference reflectance values corresponds to said wavelength and is associated with a different reference test pad type;

Furthermore, it is known for **D1** on page 6, lines 10-12 that: "*E.g. the colour recognition program may be programmed to detect automatically the **type of the test strip**, without the operator having to enter it into the apparatus separately.*"

Therefore **D1** also discloses feature E. of independent claim 1, i.e. to

E. identifying said test strip as a function of a set of determined test pad types.
D1 disclosing all features A. to E., the subject-matter of **independent claim 1** is therefore not new (Articles 33(1) and 33(2) PCT).

- 2.2 The same objection are raised against novelty of **independent claim 1** having regard to the disclosure of documents **D2** to **D4**, see the corresponding passages cited in the search report.
- 2.3 The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding **independent claims 11, 14, 15, 25, 30, 33**, which therefore are also considered not new.
3. **Dependent claims 2-10, 12, 13, 16-24, 26-29, 31, 32, 34** do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, see documents **D1** to **D4** and the corresponding passages cited in the search report.

Re Item VII

Certain defects in the international application

4. Although **claims 1, 11** (method claims) and **claims 14, 15, 25, 30** (system claims) have been drafted as separate independent claims, they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought. The aforementioned claims therefore lack conciseness and as such do not meet the requirements of Article 6 PCT.
